### PROJECTS

#### URL SHORTENER

Jan 2025

**Technologies Used:** Golang, Redis, Go Fiber, Docker Compose

- Engineered a high-performance URL shortener in Golang and Go Fiber to enhance routing efficiency and elevate user experience.
- Integrated 3 key features—custom aliases, expiry dates, and rate limiting—to mitigate abuse and streamline operations.
- Optimized URL retrieval using Redis and enforced IP-based rate limiting for robust spam prevention.
- Applied rigorous exception handling, logging, and debugging to ensure secure and reliable code.
- Containerized the application with Docker Compose for easy deployment and portability.

#### CLI-based Golang File Encryption Tool

Jan 2025

**Technologies Used:** Golang, AES-GCM, PBKDF2, SHA-1

- Designed and implemented a lightweight CLI utility in Golang for seamless file encryption and decryption, ensuring secure data storage.
- Deployed AES-GCM for strong, authenticated encryption to maintain file confidentiality and integrity.
- Leveraged PBKDF2 with SHA-1 for secure, password-derived key generation, reinforcing encryption security.

#### REAL ESTATE WEBSITE

Jan 2024

- Conceptualized and developed a responsive real estate website using React JS, incorporating React hooks for efficient state management.
- Utilized modern CSS methodologies to craft visually appealing, user-friendly interfaces, significantly enhancing overall user engagement.
- Integrated Framer Motion to deliver smooth animations and transitions, elevating the interactive experience.
- Implemented Swiper JS library for interactive image sliders, effectively showcasing property listings.
